

Native Plants for Rain Gardens

Native plants work great in rain gardens - they are adapted to our wet winters, and drought-tolerant in the summer once they are established. There are endless possibilities in choosing plants for your rain garden, but here are a few of our great native plants that would do well and be a compliment to your landscape. Some of the shrubs do get quite large, so keep this in mind and make sure you have adequate space.

Zone 1 Plants

- Red Osier Dogwood
- Twinberry
- Sedges and Rushes
- Pacific Coast Iris
- Tufted Hair Grass

Zone 2 Plants

- Indian Plum
- Snowberry
- Serviceberry
- Camas
- Vine Maple
- Beaked Filbert
- Pacific Ninebark
- Ferns
- Low Oregon Grape
- Piggyback Plant

Zone 3 Plants

- Salal
- Mock Orange
- Red Flowering Currant
