Analytical Laboratories and Consultants Serving Agriculture in the Pacific Northwest

Compiled by
Catherine H. Daniels

June 2003
Updated September 2005

World Class. Face to Face.

How to Use This List

The Food and Environmental Quality Laboratory (FEQL) compiled this list by requesting information from labs and consultants providing services to the Pacific Northwest. Companies listed their own services; we required no independent verification of their claims. Inclusion of a lab or consultant service in this list does not imply any endorsement by Washington State University. Omissions are unintentional and can be remedied by filling out the "How to Be Added" form at the back of this document.

Two sets of tables follow. Part 1 is a Matrix of Services in which the names of responding companies are listed with Xs corresponding to those services they provide. Services are grouped into general categories (chemical analysis, living organisms, nutrition, general services) and only common services are listed. For information on how to obtain more specialized or sophisticated analyses, contact Dr. Vincent Hebert, FEQL Analytical Chemist, Washington State University, 2710 University Drive, Richland, WA 99352, (509) 372-7393, or vhebert@tricity.wsu.edu. The table in Part 2 provides contact information for the companies listed in Part 1, along with any additional comments the labs or consultants wanted to communicate when they were contacted by the FEQL staff.

If you are not familiar with laboratory services, we suggest that you consider the following before collecting or submitting a sample for analysis.

Call first. It is your responsibility to carefully explain to the company representative the exact nature of your needs. The lab or consultant will then tell you which tests they can run, which test(s) would be the most useful to address your needs, what information those tests will provide, how you should collect and prepare the sample, and how to send the sample to them. Ask for an estimate as to how long it will take to get the results back to you. Often the lab has a maximum time limit they must observe in order to meet standards. If you can wait that long, the cost may be lower. Labs may also have a minimum turnaround time for the results if you are in a hurry; however, the price may be correspondingly higher.

Call several labs within your area. Generally, it is more economical to ship samples to nearby labs. Obtain price quotes as well as information on what type of written report each lab will supply. Ask if they will provide any assistance in interpreting the results if you need it. Fees can range from \$35/sample to over \$200/sample depending upon the service requested. Prices are not standardized. Extra fees may be charged for services such as explaining the written report to you over the telephone, so be sure to assess all charges in advance.

Ask about certification. Labs are certified for different procedures. (Washington State Department of Ecology has searchable lists of accredited environmental labs available at <http://www.ecy.wa.gov/programs/eap/labs/srchmain.htm>.) Ask if the lab is certified for the area in which you are requesting the analysis. Ask the company what type of quality control they employ internally. How sensitive are their methods compared to what is technically possible to detect? The reproducibility of their results is important in that it assures you they are competent in sample analysis.

WSU Puyallup Plant and Insect Diagnostic Laboratory	7612 Pioneer Way East	Puyallup	WA	98371-4998	253-445-4582	253-445-4621	http://www.puyallup.wsu.edu/plantclinic/index.htm , glass@puyallup.wsu.edu	Focus on plant problem diagnosis and insect identification. Restricted to Western Washington.

WSU Extension Bulletin EB 1578E
“Analytical Laboratories And Consultants Serving
Agriculture in the Pacific Northwest”

ADDITIONS, DELETIONS, CHANGES

This electronic publication is updated regularly.

How to Get Added

If your laboratory or consulting service is not listed in this extension bulletin and you provide services to the Pacific Northwest, please fill in the following form and send it to the address or fax number at the bottom of the following page.

Business Name:
Contact Person:
Alternate Contact Person:
Address:
City, State Zip:
Phone Number:
Web Address and/or Email:
Fax Number:

SERVICES PROVIDED (Please circle those provided by your company.):

Chemical Analysis: IR-4, Air, Heavy Metals, PCB's, Pesticides, Waste Water, Water-Domestic, Water Quality, Water-Irrigation, Food Products, and Total Petroleum Hydrocarbons.

Living Organisms: Coliform Bacteria, Plant Pathogenic Bacteria, Molds, Plant Pathogenic Fungi, Insects, Nematodes, Viruses, Plant Identification, and Seed Certification.

Nutrition: HACCP Microbiology, Animal Feeds, Plant Nutrition, Animal Nutrition, Soil Nutrition, Biosolid Analysis, Mycotoxin Contamination, Human Nutrition, and Fertilizer Composition.

General Services: Aerial Photography, Instrument Calibration, Plant Tissue Culture, Wildlife Habitat, Environmental Audits, Bee Poisoning, Pest Management, Irrigation, Soil Fertility, and Pesticide Registration.

COMMENTS:

Some companies include comments such as “Expert witness in courts and insurance companies.” Please include on the lines below any comments you wish to have included in this publication.

Comments:

How to Delete a Listing

Simply contact the Washington State Pest Management Resource Service (WSPRS) by mail or fax (see below), tell us the name of the company as it appears in this document, and request deletion. BE SURE TO SPECIFY THIS DOCUMENT, "EB1578E." Please provide a contact name and telephone number with your deletion request in case the FEQL/WSPRS staff has any questions.

How to Make a Change, Update, or Correction

The best way to change, update, or correct information about your company is to print out a copy of this PDF document and indicate the changes by marking directly on printed copies of the tables. Alternately or in addition to marking directly on the tables, you may use the form on the previous page if you wish to further clarify spellings or numbers or other important information, or want to change your "services provided" listings. If you use the form, please mark "CHANGE" clearly at the top. Then mail these sheets to the address below. (Mail is preferred to faxing for the sake of clarity in the case of changes to the tables.)

Contacts for Further Information

For information on how to report a pesticide application violation in Washington State, contact the Washington State Department of Agriculture's Pesticide Management Division at 1-877-301-4555. For information on labs that test for human exposure to pesticides in Washington State, or if you think you or someone else may have a pesticide-related illness, contact the Washington State Department of Health at (360) 236-3360. Additionally, information can be obtained from the National Pesticide Information Center at 1-800-858-7378. FOR EMERGENCIES, contact the Washington Poison Center at 1-800-222-1222.

For searchable lists of pesticides registered in Washington and Oregon, point your Internet browser to <http://picol.cahe.wsu.edu/LabelTolerance.html>.

Use pesticides with care. Apply them only to plants, animals, or sites listed on the label. When mixing and applying pesticides, follow all label precautions to protect yourself and others around you. It is a violation of the law to disregard label directions. If pesticides are spilled on skin or clothing, remove clothing and wash skin thoroughly. Store pesticides in their original containers and keep them out of the reach of children, pets, and livestock.
